

“Step by Step” to Lay Out a Three-Circuit Classical Labyrinth

When practicing on paper, place the first two steps in the center of your page, leaving room for the extra circuits that are to come. (At step 4 if you move to the right, you will have a left turning labyrinth, if you move to the left, a right turning labyrinth.)

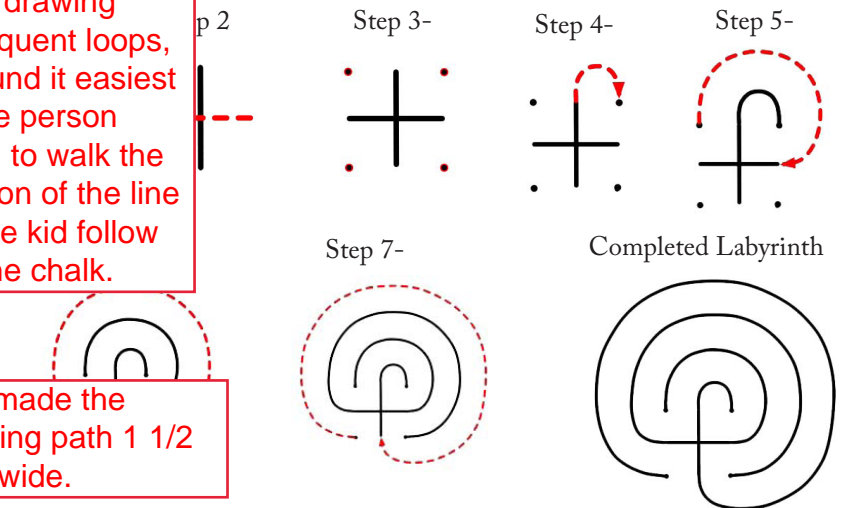

We made the starting line and cross 2 1/2 feet each

When drawing subsequent loops, we found it easiest for one person (adult) to walk the direction of the line and the kid follow with the chalk.

We made the walking path 1 1/2 feet wide.

Three-Circuit Labyrinth From Two Pieces of Rope

Color the outer line of the labyrinth one color and the other line a second color. Then choose two pieces of colored rope to create your labyrinth, making sure that your outer rope is the longer piece.

Walkable: Outside, long rope: 27 feet (823 cm)- Color:
 Inside, short rope: 24 feet (732 cm)- Color:
 These ropes make an approximate 3-circuit labyrinth that is 7-feet (213 cm) in diameter and can be modified to fit any shape or made smaller.

Tabletop: Outside, long rope: 61 inches (155 cm)- Color:
 Inside, short rope: 51 inches (130 cm)- Color:
 These ropes make an approximate 3-circuit labyrinth that is 18 inches (46 cm) in diameter.

Three-Circuit Labyrinth From Two Pieces of Rope

Color the outer line of the labyrinth one color and the other line a second color. Then choose two pieces of colored rope to create your labyrinth, making sure that your outer rope is the longer piece.

We added one more circle to make it bigger and the full labyrinth ended up being about 17 feet in diameter.
